

Letter and Number Hunt 1-9 Cognitive Skill: visual processing, working memory, attention
Challenges: Use the language and visualize: “I see you circle the 1’s and X the 2’s. What do you see yourself doing?” “I see myself circling the 1’s and putting an X on the 2’s.” Use a metronome when reading the letters/numbers beginning at 54-60 bpm and increase gradually.

	Time	Time	Time
Letters			
Read the letters names. Read the sound, Alternate saying the name / sound. Circle the letters on each row that are the same.			
I see you put a V on the vowels a, e, i, o, u.			
I see you put a V on the vowels and a C on the consonants.			
Numbers			
Read the numbers. Add the metronome.			
Circle the numbers in each row that are the same.			
Circle the even numbers, and X the odd numbers.			
I see you circle the 1’s, green cube, bear			
I see you circle the 1’s, then X the 2’s, blue cube, fish			
I see you circle the 1’s, X the 2’s, then box the 3’s, red cube, snake			
I see you circle the 1’s, X the 2’s, box the 3’s, then underline the 4’s, yellow cube, underline elephant			
Then place a line above the 5’s, black cube, turtle			
Do 1-5, then slash the 6’s, orange cube, horse			
Do 1-6, then place a (on the left of the 7’s, brown cube, camel			
Do 1-7, then put parentheses around the 8’s, white cube, spider			
Do 1-8, then put a dash through the middle of the 9’s, purple cube, pig			
Once mastered, remove sheet protector, place on a white surface, and look at the symbols and say the numbers.			
Add 1 when reading (7 is 8, 9 is 10) When fluid, read the numbers by alternating saying what the number is (=) and the next number +1. Now try doing this by looking only at the 9 symbols.			
Subtract 1 when reading (1 is 0, 8 is 7). When fluid, read the numbers by alternating saying what the number is (=), the next number +1, and the next number –1. Now do this by looking only at the 9 symbols. Then, if 8 plus 1 is 9, then 8 plus 2 is 10.			
Read the numbers by alternating the first number +2 and the next number +3. Repeat, only looking at the 9 symbols.			
Read the numbers by alternating: say the first number x2, the next number x5, the next x10. Now do this by looking at the 9 symbols.			
Read the numbers in columns A and J only. Alternate adding 1 to column A and subtracting 1 from column J.			

Mixed Letters and Numbers			
V the vowels, then C the consonants, then follow the previous symbols for 1-9 (circle 1, X 2, box 3, etc.).			
Alternate saying the number, letter, and sound. Use a metronome.
