"When I felt completely overwhelmed and isolated, Equipping Minds came along and provided us with help and encouragement via Skype. They took the time to help me understand their workbook so I could implement the games and activities at home. They seemed to understand our children's individual needs and struggles. God has used Kyle and Carol to give me hope where the educational needs of our children are concerned. For families living overseas and for the church in general, Equipping Minds is a tremendous resource, helping parents feel confident in their calling, and giving children courage and confidence as they improve their skills, literally equipping their minds for life and service in the Lord."

Shannon - MTW Romania

EQUIPPING MINDS

The brain and IQ are not stagnant but can be strengthened with the right tools and instructional methods.

Welcome to *Equipping Minds!*

Our primary mission is to work with children and adults to enhance their learning abilities by equipping their minds to reach the full potential God has for them.

We help improve...

MEMORY

PROCESSING

SOCIAL SKILLS

COMPREHENSION

CRITICAL THINKING

COMMUNICATION

"Equipping Minds is the program that puts everything together-working memory and processing training, sound therapy and reflex exercises. They have successfully broken through my daughter's learning challenges. They understand and have the tools, intuition and love for what they do to make a difference in a child's life."

Karen and John – Virginia

"Without a doubt, the workshop you led at Equipping Minds was the single most influential, useful, professional development experience I have ever attended."

Vanessa – Kentucky

"I have experienced exceptional results utilizing the Equipping Minds protocol. In three months, I have cleared two years of brain fog, doubled my processing speed and increased my memory. I am able to work faster with fewer mistakes, specifically due to improved mental agility. I would recommend this program to any professional who works under stress and shoulders significant responsibility."

Edie – Kansas

"While my son worked with Equipping Minds, the corporate employee part of my life benefited as well. As I participated in the sessions, I experienced greater focus, improved ability to ignore distractions and increased calmness. I was a more productive, happier employee!"

Jill – Kentucky

"Our daughter with Down Syndrome has increased her working memory and processing. She is now doing addition and her speech has improved. She is able to do things we never thought possible. This program has been life altering."

Traci and Tom – Florida

"The most exciting part for me, as a parent (and a professional), is to see how my daughter's confidence is soaring! She is not afraid to try things now that before were just too overwhelming to her. Self-confidence is critical to a child's success not just in school but also in life."

Allison – Kentucky
