

Equipping Minds DIY Poster Board

I cannot take credit for this idea. It was inspired entirely by another member in the EM group, and approved by Carol Brown. I'm sharing it free of charge for your personal use only, in conjunction with the Equipping Minds program.

I used a 20x30 black poster board from the Dollar store. Then I printed the pages on the "actual size" setting, cut the pieces apart, then using a removable tape roller I positioned them on the board. Once they were in position I lifted up a corner of each and used a permanent tape roller to secure them. Last step was to take the board to an Office Depot or other local office supply shop to be laminated for a small fee.

Enjoy!
